### UNLIMITED PC'S

Falcon Technologies' Online Backup lets you backup as many computers as you need using one account. With Falcon Technologies Online Backup, all of the PCs in your home or business are simply managed; no juggling multiple accounts! And because we don't charge you a separate amount for each PC, Falcon Technologies Online Backup is the most affordable way to back up your home or business.

### CONTINUOUS DATA PROTECTION WITH CLOUD SYNC

Live Protec is Falcon Technologies' Online Backup Continuous Data Protection detection feature that backs up files as soon as a change is detected. As soon as you modify a file on any of the PCs on your account, Falcon Technologies Online Backup instantly detects the change and backs up the data. When you need to access the file, whether it be from another computer or share it with a colleague, the latest version is always available.

### WEB ACCESS

Access your backed-up data from any browser! Because your data is being backed up to the Falcon Technologies Online Backup cloud, you can access your data anywhere in the world by simply getting online. Never be without a critical file again.

### FILE SHARING

With Falcon Technologies' Online Backup, as long as you have an email address, you can share any of your backed-up files. Never have a large attachment bounce again! Select as many files as you'd like to share with friends and colleagues. Home users can share photos or videos with ease.

### SOSIMPLE FILE SELECT

With SoSimple File Select, you can specify to Falcon Technologies Online Backup what type of files to back up. Select picture files, movie files, document files, or anything else. SoSimple File Select makes sure the right data is protected in the simplest way possible.

### iPHONE/BLACKBERRY APP

Access all of your files anytime, anywhere from your mobile device. The Falcon Technologies Online Backup iPhone app and Blackberry app keep your important files accessible when you need them.

### BUILT-IN LOCAL BACKUP

With the use of Falcon Technologies local backup system, you can backup your entire computer, including open, locked and operating system files to an external USB drive, a local network location, a USB stick, an iPod or any other local medium for additional protection.

### UNLIMITED VERSION ARCHIVE

Keep an unlimited version history of all your files. Roll back your books to last year's tax records if you wish. Use our time machine feature to go back to the date you want to restore your backup as of and recover that snapshot of files & versions.

### **FLEXIBLE SCHEDULING**

With Falcon Technologies' Online Backup, you have the flexibility to schedule monthly, weekly, daily or hourly backup. You also have the ability to perform an instant backup. Instead of running constantly, taking up valuable CPU and RAM resources like other online backup systems, Falcon Technologies' Online Backup runs when you schedule it, keeping you safe and optimizing your PC's performance.

### **ENTERPRISE COMPRESSION**

The Falcon Technologies' Online Backup compression system only backs up the files you change. This means that only changed 1's and 0's are transferred. On a 500 MB database (MYOB/Intuit/Turbo Tax), the daily transfer can be as small as 5 KB. Our transfer system is enterprise grade, meaning that large file transfers are resumed at the KB of interruption and do not start at the beginning like most online backup systems.

### **POWERFUL RECOVERY**

Falcon Technologies' Online Backup keeps an unlimited version history of all your files, allowing you to roll back to any version of any of your files. Use our time machine feature to go back to the date you want to restore and recover that snapshot of files and versions.

### **PHYSICAL MEDIA UPLOAD**

If you've got over 50GB of data to back up, the initial backup session can take days – even with a fast internet connection. Falcon Technologies' Online Backup exclusive PMU technology lets you "seed" your backup by sending your encrypted data on an external hard disk. Alternatively, we can send you a hard disk overnight and you can copy your backup to that disk. After that, only the changed binary will be transferred, meaning your daily backup takes just minutes.

### **ENHANCED SECURITY**

The Falcon Technologies' Online Backup system ensures complete privacy protection. Falcon Technologies Online Backup uses a three-tiered encryption system that encrypts data on the user's computer 256AES, in transit 128bit SSL and finally 1024bit AES when at rest in storage. Users can also opt to use Falcon Technologies' Online Backup UltraSafe™, an encryption process that protects your data stored on the server from even Falcon Technologies' Online Backup engineers. Only the user who put it there can ever access the data. Unlike other online backup companies, where data is neither encrypted on your client, nor stored as encrypted data, Falcon Technologies' Online Backup can prevent even employees of the company from accessing stored data.
